

Patient Prescription Policy

JVC Family Medicine does not accept prescription refill requests from pharmacies. Please also be advised that Dr. Jason DeMattia and/or other providers will typically prescribe a six month supply of medication for all non-narcotic medications. This policy may vary if deemed necessary by the Practitioner. Please be advised that fasting labs will be required every 3 - 6 months in order to properly monitor your health care. Please be sure to schedule an appointment once you pick up your last refill from the pharmacy to allow sufficient time before you run out of your medication(s). A one month prescription will be given for all controlled substances and the patient must return to the clinic monthly for all controlled substance refills. We appreciate your understanding and look forward to providing you with exceptional care!
